

Veiled chameleon

Chameleons are reptiles found mostly on the continent of Africa and in Madagascar, but can also be found in Europe and parts of Asia. There are said to be about 100 types of chameleon in the world. They mainly inhabit forest areas, living on insects and arthropods, but there are some types that also eat leaves and fruits. Chameleons can change the color of their bodies, and move their eyes separately giving them an almost 360 degree range of vision. This papercraft model is based on the veiled chameleon, a type of chameleon easy to keep as a pet.

*Assembly instructions on pages 1 and 2, and pattern on page 3.

★ Assembly Instructions

- 1) Carefully cut out the parts.
- 2) Fold along the dotted lines, making mountain or valley folds as indicated.
- 3) Follow the order indicated in the instructional diagrams, and attach the parts to assemble.
(Read the Explanation of Symbols for more information.)
- 4) Your paper craft model is finished!

★ Tools

Scissors, glue (We recommend craft glue.)

★ Caution

Keep scissors and glue away from small children.
Be careful not to cut your fingers when using scissors.
Fold the folding lines before gluing.

★ Explanation of Symbols

Cut line

Mountain fold

Valley fold

△ Numbered glue tabs
Glue the parts together in the order indicated by the numbers.

△ Glue tabs with symbols and part names
These tabs are to be glued onto the matching parts, which name is indicated on the tab.

Assembling the Veiled chameleon

1 Assemble the head

Head

2 Assemble the body

Body

3 Assemble the tail

Tail

4 Assemble the whole body

Complete!
